Витражные пленки

Самоклеющиеся пленки изготавливают на листах размером **660x460 мм**.

Потрясающий ассортимент — от простых однородных цветов и оттенков до пленок с различными текстурами и эффектами. Текстурные пленки изготавливаются вручную, путем добавления пигмента в основной цвет. Получается пленка с уникальным рисунком не похожим на другую.

Технические особенности

В основе витражной плёнки — самоклеющийся компонент Майлар TM (Mylar TM) фирмы Дюпон (Dupon). Материал прекрасно сохраняет свою форму и является сверхпрозрачным. Цветовой пигмент плёнки не блекнет и очень устойчив к влажности, растворителям и другим агрессивным воздействиям. Плёнка уплотнена протектором поверхности, этот дополнительный слоистый пластик поглощает до 90% натурального излучения ультрафиолета. Благодаря тому, что УФ фильтр соединён с компонентом Майлар TM (Mylar TM), окраска безопасным образом уплотнена и защищена от внешнего воздействия. Преимущества уплотнения поверхности — блеск стекла и защита от царапин или повреждений моющими средствами.

Применение

Пленки используют при одинарном и двойном остеклении. Все пленки отвечают требованиям стандарта BS5713 для производителей стеклопакетов.

Гарантии

Производитель дает гарантию, что потеря окраски не будет более 10% от первоначальной плотности в течение 10 лет использования, даже в суровых климатических условиях — под палящим солнцем или сильном морозе.

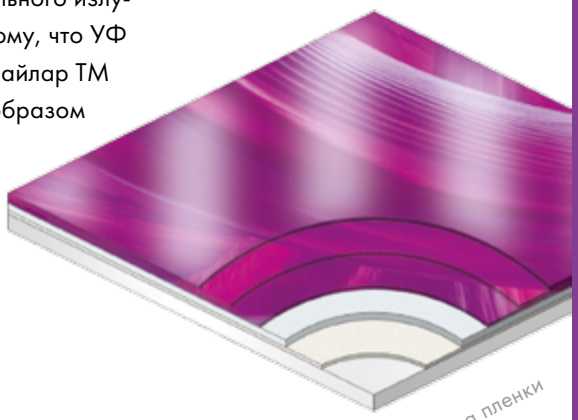
Из истории компании

Компания North Western Lead, которая производит витражные материалы под маркой Decra Led, была основана более полувека назад.

В настоящее время занимает лидирующие позиции на рынке плёночных витражей, экспортируя продукцию по всему миру, отличающуюся высоким качеством, чем несомненно гордится.

Ассортимент выпускаемой продукции огромен, более 500 видов витражной плёнки, свинцовые ленты, различных форм и фактур, фацетовые элементы, от самых простых до сложнейших многосоставных форм, а также широкий выбор инструментов для удобной работы. *Вся продукция прошла сертификацию и соответствует европейскому стандарту EN 1279 для стеклянных поверхностей.*

Всё это позволяет создавать самые потрясающие, качественные витражи, которые прослужат не одно десятилетие.



Структура пленки

Мы, как официальные прямые поставщики Decra Led, занимаемся распространением продукции на территории России и стран СНГ. Приобрести необходимые материалы можно, оформив заказ в интернет-магазине: **www.vitrajmaterial.ru**, и позвонив по телефону: **8 (495) 540-40-63** или **8 (800) 555-13-95** (*звонки по России бесплатны*).
Мы с удовольствием ответим на любые важные вопросы и поможем с решением поставленной задачи.
Да, и ещё нам можно написать на электронную почту — **info@vitrajmaterial.ru**, и мы сразу ответим.

Обратите внимание! Корректная передача цвета, прозрачность и другие эффекты ограничены возможностями печати. Рекомендуем дополнительно использовать вееры с образцами пленок.
